**Description**

Currently we use the old API for nfqueue. Example code: [https://git.netfilter.org/libnetfilter_queue/tree/examples/nf-queue.c](https://git.netfilter.org/libnetfilter_queue/tree/examples/nf-queue.c)

This API should be faster, and gives more flexibility. For example #808 depends on this.

**Subtasks:**  
Feature # 808: Support the new GSO-avoidance NFQ feature

**Assigned**

**History**

#1 - 11/05/2014 04:50 AM - Victor Julien
- Target version changed from 3.0RC2 to Soon

#2 - 05/20/2015 09:16 AM - Victor Julien
- Status changed from Assigned to New
- Assignee changed from OISF Dev to Anonymous
- Target version changed from Soon to TBD

#3 - 07/13/2018 06:51 PM - Victor Julien
- Effort set to medium
- Difficulty set to high

#4 - 02/23/2019 10:15 PM - Andreas Herz
- Assignee set to Community Ticket
