**Description**

Currently we use the old API for nfqueue. Example code: [https://git.netfilter.org/libnetfilter_queue/tree/examples/nf-queue.c](https://git.netfilter.org/libnetfilter_queue/tree/examples/nf-queue.c)

This API should be faster, and gives more flexibility. For example [#808](#808) depends on this.

**Subtasks:**

- Feature # 808: Support the new GSO-avoidance NFQ feature

**History**

- **#1 - 11/05/2014 04:50 AM - Victor Julien**
  - Target version changed from 3.0RC2 to 70

- **#2 - 05/20/2015 09:16 AM - Victor Julien**
  - Status changed from Assigned to New
  - Assignee changed from OISF Dev to Anonymous
  - Target version changed from 70 to TBD

- **#3 - 07/13/2018 06:51 PM - Victor Julien**
  - Effort set to medium
  - Difficulty set to high

- **#4 - 02/23/2019 10:15 PM - Andreas Herz**
  - Assignee set to Community Ticket
