**Description**
Currently we use the old API for nfqueue. Example code: [https://git.netfilter.org/libnetfilter_queue/tree/examples/nf-queue.c](https://git.netfilter.org/libnetfilter_queue/tree/examples/nf-queue.c)

This API should be faster, and gives more flexibility. For example #808 depends on this.

**Subtasks:**
Feature # 808: Support the new GSO-avoidance NFQ feature

**History**

* #1 - 11/05/2014 04:50 AM - Victor Julien
  - Target version changed from 3.0RC2 to 70

* #2 - 05/20/2015 09:16 AM - Victor Julien
  - Status changed from Assigned to New
  - Assignee changed from OISF Dev to Anonymous
  - Target version changed from 70 to TBD

* #3 - 07/13/2018 06:51 PM - Victor Julien
  - Effort set to medium
  - Difficulty set to high

* #4 - 02/23/2019 10:15 PM - Andreas Herz
  - Assignee set to Community Ticket
