**Description**

Hello! Please, add the installation sheet for openSUSE distro to wiki-page:
https://redmine.openinfosecfoundation.org/projects/suricata/wiki/Suricata_Installation

I have the same error-message, described in bugs #1225, #1525 (about configure: error: libnetfilter_queue/libnetfilter_queue.h not found) and installation sheet for openSUSE distro will be really appreciated in this case. Thank you!
