Suricata - Bug #2207
DNS UDP "Response" parsing recording an incorrect value
09/01/2017 03:10 AM - Derek Kingsbury

| Status:     | Closed          |
| Priority:   | Normal          |
| Assignee:   | Derek Kingsbury |
| Category:   |                |
| Target version: | 4.0.1          |
| Affected Versions: |        |
| Difficulty: |                |

**Description**

Must change

```c
if (f != NULL) {
    dns_state->last_req = f->lastts;
}
```

to:

```c
if (f != NULL) {
    dns_state->last_resp = f->lastts;
}
```

The procedure is currently recording the last request (last_req), rather than the last response (last_resp) as it should to be consistent with the Response parsing.

**History**

**#1 - 09/06/2017 03:52 PM - Andreas Herz**

Since you found it, would you mind sending a PR for that? See more details at [https://redmine.openinfosecfoundation.org/projects/suricata/wiki/Contributing](https://redmine.openinfosecfoundation.org/projects/suricata/wiki/Contributing)
