### Description

Must change

```c
if (f != NULL) {
    dns_state->last_req = f->lastts;
}
```

to:

```c
if (f != NULL) {
    dns_state->last_resp = f->lastts;
}
```

The procedure is currently recording the last request (last_req), rather than the last response (last_resp) as it should to be consistent with the Response parsing.

### History

#### #1 - 09/06/2017 03:52 PM - Andreas Herz

Since you found it, would you mind sending a PR for that? See more details at https://redmine.openinfosecfoundation.org/projects/suricata/wiki/Contributing

#### #2 - 09/20/2017 07:23 AM - Victor Julien

- Status changed from New to Closed

https://github.com/inliniac/suricata/pull/2888

#### #3 - 10/16/2017 01:26 AM - Victor Julien

- Subject changed from DNS UDP "Respone" parsing recording an incorrect value to DNS UDP "Response" parsing recording an incorrect value
