Description
Now that I started using -r <dir> I noticed that I often would like to have a way to have it go into subdirs as well.

I guess one thing to consider here is that following symlinks has risks wrt going in circles.

History
#1 - 12/20/2017 08:36 PM - Danny Browning
First implementation could be to check if directory is a symlink and not process it.

#2 - 06/12/2018 05:26 PM - Jason Ish
- Effort set to medium
- Difficulty set to medium

#3 - 03/11/2019 01:53 PM - Victor Julien
- Assignee set to Community Ticket

#4 - 06/08/2020 01:55 PM - James Dutrisac
- Assignee changed from Community Ticket to James Dutrisac

#5 - 07/17/2020 05:48 PM - Jason Ish
- Status changed from New to In Review
