Suricata - Feature #2416
Increase XFF coverage to files and http log
01/15/2018 09:00 AM - Maurizio Abba

Description
XFF support is restricted to alert events. It would be nice to increase its coverage to HTTP and alert.

This modification will require the transformation of the HttpXFFGetIP to accept flows instead of packets. This function will anyway only use `p->flow`, using the flow directly instead of the single packet will obtain the same effect and allow to get the correct IPs.

I'm not sure what logging would you include in this patch. Currently, XFF can be configured for eve-log and unified log. I added XFF support for files and http in eve-log. I didn't modify http.log, fast.log and metafiles.
