### Description

This request came up at Suricon2018, but has come up before. The idea is to turn much of Suricata into a library that can be reused in other tools.

The first step would be to define some of the use cases we'd like to initially support so that an API could be designed for that.

One of the use cases that has been brought forward is to be able to integrate the Suricata detection and logging into OVS.
