Description	
In order for suricata-update to run without a sudo or as a root, the following permissions are required:	
<ul style="list-style-type: none">• Directory /etc/suricata: read access• Directory /var/lib/suricata/rules: read/write access• Directory /var/lib/suricata/update: read/write access	
Add steps to documentation to setup the above directories with the correct permissions i.e.	
<ol style="list-style-type: none">1. create a suricata group.2. setup the above directories with the correct permissions for the suricata group.3. add users to the suricata group.
