**Description**

It seems the command line help sometimes differs from the online docs in terms of what is sticky buffer. Example `http.uri` and `http.uri.raw`

and

```
/opt/suritest/bin/suricata --list-keywords=http.uri
= http.uri =
Description: sticky buffer to match specifically and only on the normalized HTTP URI buffer
Features: No option, sticky buffer
```

```
/opt/suritest/bin/suricata --list-keywords=http.uri.raw
= http.uri.raw =
Description: sticky buffer to match specifically and only on the raw HTTP URI buffer
Features: No option, sticky buffer
```

```
/opt/suritest/bin/suricata -V
This is Suricata version 5.0.0-dev (64a789bbf 2019-10-18)
```

**History**

**#1 - 11/07/2019 09:37 PM - Andreas Herz**
- Assignee set to OISF Dev
- Target version set to 70

**#2 - 11/07/2019 09:37 PM - Andreas Herz**
- Tracker changed from Bug to Documentation

**#3 - 08/07/2020 02:15 PM - Victor Julien**
- Target version changed from 70 to TBD
