**Description**

Similarly to [Task #3408](#3408), the SMTP parser should place reasonable constraints on the amount of resources allocated for variable length items, e.g., filenames.

**Related issues:**

- Copied to Task #3513: SMTP should place restraints on variable length items (e.g., filenames) - Closed
- Copied to Task #3514: SMTP should place restraints on variable length items (e.g., filenames) - Closed
