Suricata - Feature #3487
multi-part parser in Rust

02/18/2020 10:24 AM - Victor Julien

Status: Assigned
Priority: Normal
Assignee: Philippe Antoine
Category:
Target version: 7.0rc1
Effort: 
Difficulty: 

Label: 

Description
Implement a multi-part parser in Rust for use in the HTTP parser. It should be generic enough that other parts of the engine can also use it w/o too many changes.

This might be done using the libhtp2 (rust libhtp) work underway. Libhtp contains a multipart parser I think, so this rust conversion would have this as well?
