Dataset reputation invalid value logging

04/27/2020 10:46 AM - Victor Julien

**Status:** Closed  
**Priority:** Normal  
**Assignee:** Victor Julien  
**Category:**  
**Target version:** 6.0.0rc1  
**Affected Versions:**  
**Difficulty:**  
**Effort:**  
**Label:**  

**Description**
If we have a reputation based list with the format hash, reputation, Suricata should warn/error on non integer value. For example if we have:

86693cd03002dab7cef598e8237b257ec1a872f30300e4390ba9b1584b4ea0f0,5.0

from Victor:
"Reputation is an int, not a float. So just use 0, 1, 600, etc."
