Suricata - Support #3722

configure suricata.yaml for performance

05/22/2020 02:30 PM - leonardo kasper

Status: New
Priority: Normal
Assignee: Community Ticket
Category:
Affected Versions: 5.0.2
Label: Needs backport to 5.0

Description
how can I best configure suricata.yaml to have the best suricata performance?

could you show me?

History
#1 - 05/22/2020 09:10 PM - Andreas Herz
- Tracker changed from Bug to Support
- Subject changed from configure suricata.yaml to configure suricata.yaml for performance
- Assignee set to Community Ticket
- Label Needs backport to 5.0 added

That depends on your environment/setup. There are guidelines at the official documentation:
