Suricata - Feature #5152
Anomaly: CredSSP support addition to Suricata anomaly parsing
02/23/2022 10:40 AM - Peter Manev

Description

CredSSP can be used for http authentication, it may not be the best option in terms of security but it is available.

Currently suricata generates an anomaly event (REQUEST_AUTH_UNRECOGNIZED) on inspecting http auth with CredSSP that could result in millions such events in a organisational setup with lots of powershell usage for example.

```json
{
  "timestamp": "2021-11-15T17:29:46.150405+0100",
