add `alert-queue-expand-fails` command-line option (5.0.x backports)

06/03/2022 10:23 PM - Juliana Fajardini Reichow

**Status:** New
**Priority:** Normal
**Assignee:** Juliana Fajardini Reichow
**Category:**
**Target version:** 5.0.11
**Effort:**

**Description**
We want to be able to test how Suri behaves when the growth (reallocation) of the alert queue fails. This command-line option would sort of disable the function, to simulate that situation.
