Suricata - Feature #734
Ubuntu PPA should be compiled with unix socket support enabled

Description
I would really love to start using suricatasc, but the suricata binary in the Ubuntu PPA is not compiled with unix socket support.

Seems like just adding a build dependency on libjansson-dev and runtime dependencies on libjansson4 (for unix socket support) and python-simplejson (for suricatasc) should get it working...

Thanks!

very true!

#2 - 02/17/2013 12:27 PM - Peter Manev
Feature added.
Ubuntu PPA stable - updated.

#3 - 03/29/2013 09:52 PM - Reed Loden
This seems to have been reverted in the 1.4.1 upgrade. :(!

Would appreciate it being fixed again so I can use suricatasc!

Thanks.

Also, looks like the next version of suricata will have an --enable-unix-socket option as well, so wonder if you should just go ahead and add that to the configure invocation now. See https://github.com/inliniac/suricata/pull/332

#5 - 03/30/2013 03:15 AM - Victor Julien
It will be re-enabled in 1.4.2. We disabled it because with unix socket enabled PPA package generation failed for a number of Ubuntu versions due to a libjansson library version issue.

#6 - 10/26/2013 10:21 AM - Victor Julien
- Target version set to TBD

#7 - 02/07/2014 09:01 AM - Victor Julien
Is it enabled in the current PPA?

#8 - 02/07/2014 09:42 AM - Peter Manev
Not at the moment.
There was an issue with unix-socket (IIIRC that is cleared now). I can try/test re-enabling it in the daily and beta/rc builds?

#9 - 06/26/2014 02:36 PM - Peter Manev
- Status changed from New to Closed

Fixed
#10 - 04/24/2015 04:37 AM - Victor Julien
- Target version deleted (TBD)

#11 - 04/24/2015 04:42 AM - Victor Julien
- Target version set to Packaging/PPA
