Suricata - Feature #966
scan-build support in the buildbot
09/18/2013 04:32 AM - Victor Julien

Status: Assigned

Description
Ciang’s scan-build is a very useful code analyzer. It outputs to html, but it also prints to the screen.

e.g.

```c
util-radix-tree.c:733:42: warning: Call to 'malloc' has an allocation size of 0 bytes
   if ( (inter_node->netmasks = SCMalloc((node->netmask_cnt - i) *
          ^~~~~~~~~~~~~~~~~~~~~~~~~~
./util-mem.h:166:14: note: expanded from:
   ptrmem = malloc((a));
   ^
1 warning generated.
```

Think it would be good to make sure we are scan-build clean and then make it part of the prscript slave.
