### Description
We need a build that runs valgrind's leak check on pcaps with rules. Preferably more than one.

This build should fail on any leaked memory detected, which means we first have to fix a bunch of them as we are not clearing all one-time allocations.

Leaks that can't be fixed or are in support libraries should be suppressed.

### History

1. **01/01/2016 06:13 PM - Andreas Herz**
   - Assignee set to OISF Dev

2. **03/11/2021 09:43 AM - Philippe Antoine**
   - Status changed from New to Closed

We now have ASAN builds in CI running surictaa-verify tests
